

The PressMate Coffee Press

Summary

Team Bob the Builders: Will Castro, Jos Moresi, Li Arditi, and Sam Eppley

A compact, steel, single-serve coffee-brewing device

Motivation - Drawbacks of Competitor's Product

1. Hard
to press

2. Need a
separate
cup

3. \$170?!
No.
Why.

AeroPress Coffee Maker - Steel

Stainless Steel 3 in 1 Coffee Press

\$169.95 **NEW**

A new standard in coffee flavor. Crafted from double-wall stainless steel with a large capacity, our unique 3-in-1 brew method speeds up extraction for less bitterness and a smoother, more full-bodied cup.

Color: **Silver**

Prototype Progression

Processes

Jos welding. He became a pro. Very sexy welds ;)

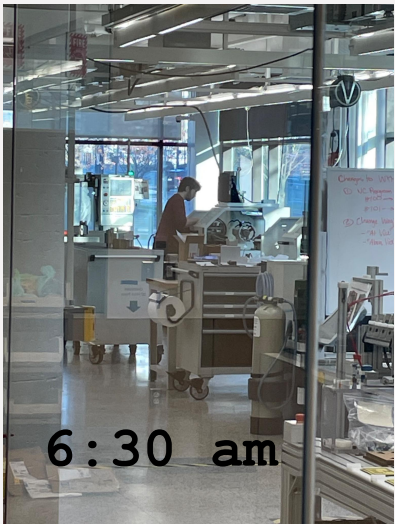

Dirty from polishing but so worth it. They're so shiny!

EDM is sooo slow

Working hard or hardly working?

Definitely working hard. Ryan let us in early. A saviour.

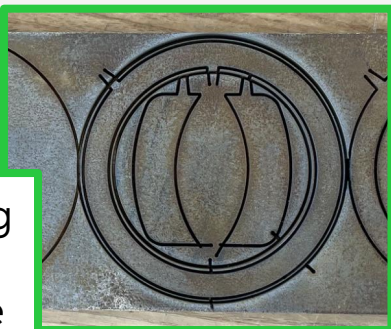

Crash-outs

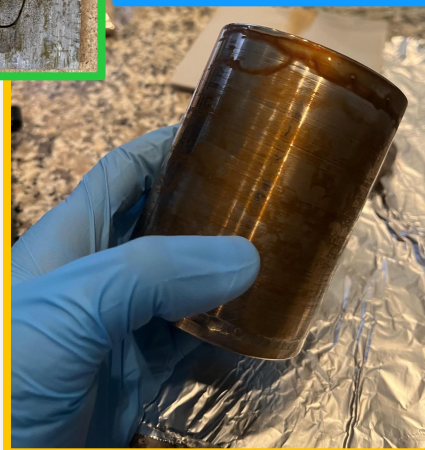

Wire EDM
clogged...good
thing Li likes
untangling
things

...But Li fixed it by recutting
it and it was perfectly
aligned because she is the
waterjet whisperer

Waterjet did not cut
all the way through.
Not even halfway...

One day our presses sealed.
Nothing was done to them. The
next day they didn't seal :(Needed
to retest ALL of them

First round of
vessel seasoning
with a foam
sponge turned out
UGLY. Jos had to
get it off with
steel wool and
redo

Key Takeaways

1. O-Ring dynamics
2. Fixturing without deformation
3. Seasoning
4. Circling Squares
5. Human Error
6. Other peoples' incompetence (crashing tools)
