EDUCATION

Boston University

Master of Engineering (MEng) in Biomedical Engineering, GPA: 3.94/4.00

Boston, MA
Expected May 2026

Relevant Courses: Biomedical Measurements; Medical Robotics; Advanced Biomedical Design and Development (Fall '25 - Sp '26); Feedback Control Theory for Biological Systems; Programming Fundamentals for BME Data Analysis; Biomedical Data Science & Machine Learning (Sp '26); Product Realization (Sp '26)

The University of Chicago

Bachelor of Arts in Neuroscience, Minor in Computer Science, GPA: 3.56/4.00

Chicago, IL
June 2021

RELEVANT SKILLS

Programming: Python, MATLAB, C#, SQL, Javascript, SVN/Git, Onshape/CAD, Arduino, Raspberry Pi, PHP, SQL, HTML

Quality & Design: Human factors analysis, Requirement Traceability Matrix (RTM), Design for Manufacturability (DFM), Validation and Verification Testing, Failure Modes and Effects Analysis (FMEA)

Laboratory & Machining: Human-subject research, OR protocols, 3D printing, milling, laser cutting, vacuum forming, casting

PROJECT EXPERIENCE

Orthopedic Surgery Product Design & Development

Boston, MA

MEng Capstone Project | Team of 4

September 2025 - May 2026 (Expected)

- Collaborated with diverse clinical stakeholders during 50+ hours of OR observations to analyze clinical workflows, identify usability risks, and inform design inputs for unmet needs
- Designing, prototyping, and testing a device for skeletal traction aligning with regulated medical device development standards throughout the full product lifecycle

Single-Serving Coffee Press

Boston, MA

Product Realization Course Project | Team of 4

January 2026 - (May 2026)

- Designing, prototyping, and documenting workflow for 100k/year mass production plan of French-press style coffee brewer
- Established and documented standards, workflows, and automations for enterprise data management (EDM) plan

Endoscope Stabilization Sleeve

Boston, MA

Medical Robotics Course Project | Team of 5

January 2025 - May 2025

- Designed and prototyped a robotic endoscope stabilization system using pneumatic actuation, pressure sensing, and Arduino-based control and software components
- Prepared grant application materials in alignment with NIH guidelines, emphasizing technical performance, clinical significance, and innovation

PROFESSIONAL EXPERIENCE

Cognitive Neuroimaging Center at Boston University

Boston, MA

Graduate Research Assistant

May 2025 - September 2025

- Implemented LSL workflow in Python and C# to collect, validate, and analyze multimodal clinical data (EEG, eye tracking, wearable inertial measurement units, etc) with millisecond synchronization precision
- Documented 30-page report of research findings, experimental methods, system architecture, systems integration, lessons learned, and next steps to support traceability, knowledge transfer, and future development

Turner Construction Company

New York, NY

Virtual Design and Construction (VDC) Engineer

October 2023 - February 2024

- Coordinated cross-functional team of 5-10 subcontractors to manage design models in Revit and Navisworks, reviewing model data for compliance with specifications, identifying risks, trends, and discrepancies requiring escalation
- Presented design-related issues to internal teams and external clients, facilitating dialogue to drive problem-solving and ensure alignment with stakeholder expectations

VDC Software Engineer

March 2021 - June 2024

- Managed and collaborated with 1-2 team members to develop 5 custom web apps, providing centralized performance metrics visualization to support management decisions and continuous improvement initiatives
- Recognized with 2022 Staff Award for outstanding contribution towards improvement of overall quality and performance of company and its service to clients and the industry

EXTRACURRICULAR AND LEADERSHIP ACTIVITIES

Boston University Graduate Organizations

Boston, MA | September 2024 - present

- Active participant in Graduate Women in Science and Engineering (GWISE), Out in Stem (oSTEM), Student Association of Graduate Engineers (SAGE), and Recreational Tennis (sports practice)

Turner Pride Network, Co-lead, LGBTQ+ Employee Resource Group

New York, NY | August 2022 - May 2024

- Promoted LGBTQ+ visibility, inclusion, and diversity throughout company and general construction industry with educational and social events, presentations, and panels
