

STEP BY STEP OF EVERYTHING LI HAS WORKED ON:

1. Unity vs Unreal	3
1.1. Background	3
1.2. Results	3
1.3. Conclusion	3
2. Validate the LED solution for eye tracking	3
2.1. Background	3
2.2. Verification process	4
2.3. Results	5
2.4. Conclusion	5
3. Learn and implement Lab Streaming Layer (LSL)	6
3.1. Lab Streaming Layer (LSL)	6
a. What is LSL and why use it	6
b. How is it used in our setup	7
c. How far have I gotten	7
d. What needs to be done	8
e. Additional Resources	8
3.2. LabRecorder (LR)	8
a. What is LabRecorder and why use it?	8
b. How to use it	8
c. How far have I gotten	10
d. What needs to be done	10
3.3. Unity (wrt LSL)	10
a. [What is Unity]	10
b. How is it used in our setup	10
c. How far have I gotten	10
d. What needs to be done	11
3.4. Pupil Neon (eye tracking)	12
a. What is it	12
b. How to implement from scratch	12
c. How far have I gotten	12
d. What needs to be done	12
e. Additional resources	13
3.5. Extensible Data Format (XDF) files	13
a. What is it	13
b. How is it used in our setup/how to implement from scratch	13
c. How far have I gotten	14
d. What needs to be done	15
3.6. Vicon Motion Tracking	15
a. What is it	15
b. How is it used in our setup/how to implement from scratch	15
c. How far have I gotten	15
d. What needs to be done	15
4. Setting up a new Raspberry Pi (RPi or Pi)	15
5. Boas IMUs	16
5.1. Background	16
5.2. How to set up and use	16

5.3. Progress	17
5.4. Next Steps	17
6. Movella Dots (not much)	17
6.1. Background	17
6.2. How to implement from scratch	17
6.3. How far have I gotten	17
6.4. What needs to be done	18
6.5. Resources	18
7. Random solutions and notes	18
7.1. Vicon	18
7.2. Raspberry Pi	20
7.3. Unity	21
7.4. PotPlayer	21
8. Overall further work	21
9. List of Files	21
10. List of Resources	22
APPENDIX A. PUPIL NEON DISCORD CORRESPONDANCE	23
I. Eye camera video visualization and LED solution	23
II. Synchronization Time Sync vs. LSL	24
III. Where time delays may arise with Neon Events and LSL	25
APPENDIX B. BOAS IMU OVERVIEW	26
I. Overview	26
II. Components:	26
1. NinjaNIRS adaptor card	26
2. IMU splitter	27
3. IMU cubes	27
III. Technical Details	28
IV. Setup and Data Collection	29
1. Hardware Setup	29
2. Software Setup	29
3. Data	30
V. Additional Comments	30

Note, please read Anna's document (Mobile Platform Technical Setup Sheet) first. It gives a good general overview of what the goal is and why we are doing things. This document is a more technical review of what I've worked on, issues I've run into, and things I would have wanted to continue working on.
